SUMMARY

B.Tech Artificial Intelligence & Data Science graduate (CGPA 8.07) with experience building and evaluating machine learning models end to end, from data preprocessing through model training and deployment behind a REST API, plus current work designing evaluation tasks and test harnesses for AI coding agents at Handshake AI. Hands on experience on both classical ML (Random Forest) and deep learning (YAMNet with a Bi-GRU classifier) pipelines.

TECHNICAL SKILLS

Languages: SQL, Java, C
Software Engineering: Debugging, Unit & Regression Testing, Version Control (Git), Code Review, Issue Tracking, Agile Collaboration
Data Engineering: ETL Pipeline Development, Data Extraction Frameworks, Data Cleaning & Validation, Data Pipeline Debugging, REST APIs
Web & Backend: Flask, REST API Development
Tools & Cloud: Git, GitHub, GitHub Actions (CI/CD), Postman, Google Cloud APIs, Claude Code, Vercel, Render
Currently Learning: Advanced SQL

EXPERIENCE

Project Dynamo Contributor | Handshake AI, Remote *Jul 2026 to Present*

- Build and evaluate repository level tasks used to benchmark AI coding agents on realistic debugging, implementation, and reasoning challenges.
- Author task instructions, reference solutions, and test suites, and harden evaluation tasks against superficial or overfit agent solutions to keep results deterministic and reproducible.
- Use Claude Code as a day to day tool for authoring tasks, debugging failing test harnesses, and iterating on verification logic across dozens of review rounds.

Google Summer of Code 2025 Contributor | DBpedia, Remote *May 2025 to Sep 2025*

- Debugged coordinate sign errors in a large scale data extraction pipeline, correcting 10,000+ Wikipedia sourced entries used as training/reference data.
- Built a configurable extractor list, reducing unnecessary data processing overhead by approximately 40%.

DBpedia Extraction Framework Intern | DBpedia Association, Remote *Sep 2025 to Dec 2025*

- Fixed date and calendar mapping bugs in the Wikipedia/Wikidata pipeline, improving quality of the temporal data used downstream.

PROJECTS

Audio Anomaly Detection | *Python, YAMNet, Bi-GRU, Flask*

github.com/haniyakonain/Audio-Anomaly-Detection | *audio-anomaly-detection.onrender.com*

- Built an audio anomaly/classification system on the MIMII industrial sound dataset using YAMNet embeddings with a Bi-GRU classifier.
- Served model inference through a Flask API.

EcoAyur | *Python, Flask, React.js, Pandas, NumPy, Scikit-Learn, Beautiful Soup, Data Visualization*
github.com/haniyakonain/ecoayur | *ecoayur.vercel.app*

- Collected and cleaned training data from 5+ herbal remedy sources, then trained a Random Forest classifier achieving 85% accuracy.
- Connected the Flask ML backend to a React.js frontend for real time recommendations, deployed on Vercel.

EDUCATION

B.Tech in Artificial Intelligence & Data Science | Shadan Women's College of Engineering and Technology, Khairatabad
CGPA: 8.07 | Sep 2022 to May 2026

ACHIEVEMENTS

- Top 15 of 642 teams, Datanyx Hackathon (Nov 2024)
- Top 16 of 140 participants, Stanley Code-a-Thon (Dec 2024)
