SUMMARY

B.Tech Artificial Intelligence & Data Science graduate (CGPA 8.07) with hands on experience building and optimizing data extraction and ETL pipelines through Google Summer of Code 2025 and a DBpedia Extraction Framework internship, processing large scale structured datasets sourced from Wikipedia and Wikidata. Skilled in SQL, with a strong foundation in data cleaning, pipeline configuration, and data quality assurance. Seeking Data Engineer / Data Analyst roles to build reliable data systems and drive insight from data.

TECHNICAL SKILLS

Languages: SQL, Java, C
Software Engineering: Debugging, Unit & Regression Testing, Version Control (Git), Code Review, Issue Tracking, Agile Collaboration
Data Engineering: ETL Pipeline Development, Data Extraction Frameworks, Data Cleaning & Validation, Data Pipeline Debugging, REST APIs
Web & Backend: Flask, REST API Development
Tools & Cloud: Git, GitHub, GitHub Actions (CI/CD), Postman, Google Cloud APIs, Vercel, Render
Currently Learning: Advanced SQL

EXPERIENCE

Google Summer of Code 2025 Contributor | DBpedia, Remote *May 2025 to Sep 2025*

- Fixed coordinate sign errors in the DBpedia Extraction Framework's data pipeline, correcting 10,000+ Wikipedia sourced location records for downstream consumers.
- Built a configurable extractor list to enable targeted, selective data extraction, cutting pipeline processing overhead by approximately 40%.
- Worked with international mentors across time zones via GitHub and Slack, delivering all data pipeline milestones on schedule.

DBpedia Extraction Framework Intern | DBpedia Association, Remote *Sep 2025 to Dec 2025*

- Fixed date and calendar mapping bugs in the Wikipedia/Wikidata ingestion pipeline, improving temporal data quality across the DBpedia core dataset.
- Enabled Wikidata extraction from the GUI and added a selectable extractor list, reducing manual pipeline configuration time for contributors.

Project Dynamo Contributor | Handshake AI, Remote *Jul 2026 to Present*

- Design repository level data and software tasks with deterministic test suites, fixtures, and validation workflows so evaluation results stay reproducible.

PROJECTS

EcoAyur | *Python, Flask, React.js, Pandas, NumPy, Scikit-Learn, Beautiful Soup, Data Visualization*

github.com/haniyakonain/ecoayur | *ecoayur.vercel.app*

- Built a data collection and cleaning pipeline scraping 5+ herbal remedy sources, then trained a Random Forest classifier achieving 85% accuracy.
- Served the trained model through a Flask REST API connected to a React.js frontend, deployed on Vercel.

CinePix | *React.js, Tailwind CSS, REST APIs*

github.com/haniyakonain/cinepix | *cinepix-five.vercel.app*

- Built a full stack platform integrating REST APIs for real time showtimes and ticket booking, deployed on Vercel.

EDUCATION

B.Tech in Artificial Intelligence & Data Science | Shadan Women's College of Engineering and Technology, Khairatabad
CGPA: 8.07 | Sep 2022 to May 2026

ACHIEVEMENTS

- Top 15 of 642 teams, Datanyx Hackathon (Nov 2024)
- Top 16 of 140 participants, Stanley Code-a-Thon (Dec 2024)
